

# Lê Quý Hiếu

Junior Full-stack developer

Email: lequyhieu1024@gmail.com

Phone: 033 847 5943

Website: https://lequyhieu.id.vn/, https://helpmeit.click/

Address: Quan Hoa, Cau Giay, Ha Noi

### **OBJECTIVE**

#### Short-term:

As a Junior Fullstack Developer with a focus on PHP, Node.js, and React, I'm looking for a role where I can apply what I've learned, build real-world projects, and continue improving my skills. I want to work with experienced teams, contribute to meaningful products, and grow step by step in the field of web development.

#### Long-term:

In the long run, I hope to become a mid-level or senior Fullstack Developer. My goal is to take on bigger responsibilities, build scalable applications, and work on projects that make a real impact. I also want to keep learning, stay up to date with new technologies, and eventually help guide and support junior developers like myself.

#### **SKILL**

Back-end	PHP, Laravel, CakePHP, Cogelgniter, NodeJs
Front-end	HTML5&CSS3, Javascript, Typescript, ReactJs, NextJs, Antd, Bootstrap, Tailwind
DBMS	MySQL, MongoDB
Other	Docker, CI/CD, Linux cmd basic, Redmine, Jira, Trello
English	FPT level 3 ( ~425-475 TOEIC)
Source Control	Github, Gitlab

### **WORK EXPERIENCE**

12/2023 - 07/2024

### **HTA High Technology Access Solution Joint Stock Company**

- Intern MERN stack
  - Participated in building e-commerce websites using Laravel + Nodejs and ReactJs to create powerful and scalable solutions.
  - Worked with a cross-functional team to customize and deploy ERP and CRM software tailored to the specific needs of business clients.
  - Gained experience in key features such as user authentication, flexible access control, and integration with third-party payment systems.
  - Involved in code reviews, debugging, and knowledge-sharing sessions to promote development and continuously learn from experienced professionals.

07/2024 - now

#### **NEWWAVE SOLUTIONS JOINT STOCK COMPANY**

- Fresher Junior PHP developer
  - Participated in two Japan-based project: Contributed to a real-world web development project for Japanese clients, applying skills in PHP, Cakephp, and Codelgniter to deliver functional features.
  - Learned meticulous project execution: Gained insights into precision and attention to detail in software development, adapting to high standards and structured workflows from Japanese work culture.
